## PROFESSIONAL SUMMARY

Final-year BCA student with practical experience in Python programming and responsive web design using HTML, CSS, and Bootstrap. Strong analytical, communication, and teamwork skills with a focus on process improvement and operational efficiency. Quick to adapt to new tools and environments with a keen interest in data-driven decision-making and business operations. Eager to contribute as an Operations Analyst in a dynamic, growth-oriented organization.

---

## PROJECTS

### HandMade Craft store Web Page— Built using Html, Css, Bootstrap

Created a Handmade Craft Store Web Page using HTML, CSS, and Bootstrap, providing a responsive and user-friendly interface for browsing and purchasing handmade crafts.

### Fitness Tracker with Ai personal Trainer — Built using Python

Developed a Fitness Tracker with AI Personal Trainer using Python to provide personalized workout plans based on user data.

### AgroLink — Built using C#, ASP.NET, HTML, CSS, and SQL Server

Created a Farmer Support and Marketplace Web Application to help farmers manage crops, access marketplace updates, and connect directly with buyers. Designed a responsive and user-friendly interface with database connectivity using SQL Server for storing user and product details.
