Team for college cultural fest – ‘CUL-AH ‘23’**

ACADEMIC PROJECTS

**Comparative Analysis of Insurance
Undertaken by Different Income Groups**
Purpose of the research was to understand insurance preferences across income groups (LIG, MIG, HIG). The analysis was based on interviews, survey and field visits.

**Research Report on ‘Spending Patterns of
Immigrant Students’**
Prepared a statistics report which aimed to investigate the spending patterns of immigrant students, focusing on understanding the factors influencing their financial decisions and the challenges they face in managing their expenses

**Analyzing the significant difference in
Average Life Expectancy across the
continents – Asia, North America and
South America**

Prepared a data analytics project to understand regional variations in life expectancy to tackle health inequities, shape resource distribution and create effective health initiatives. Analysis was conducted using ‘R’ and the statistical method used was ‘One-way ANOVA’
